CHIA JIN HAU (HUDSON)

DATA ANALYTICS MAJOR

ABOUT MYSELF

Computer Science undergraduate majoring in Data Analytics. Learned basic data concepts through coursework and academic projects. Currently learning SQL and basic data analysis skills. Has experience working in operations and customer service, which helped build attention to detail, teamwork, and problem-solving skills. Looking for an entry-level or internship role to gain hands-on experience and grow in data-related work.

Professional Experience

Customer Service Executive

Webhelp (Taiwan Foodpanda Project) | Sep 2023 – Dec 2023

- Handled customer requests through chat and email, practicing clear communication and active listening skills.
- Managed a high number of cases daily, improving time management and ability to work under pressure.
- Resolved customer issues by following guidelines and using problem-solving skills in real time.
- Worked with an international team, building teamwork skills and adapting to different working styles.

Outlet Operation Manager

AC Cake House (M) Sdn Bhd | 2017 - 2023

- Conducted data-driven performance reviews, resulting in a 20% drop in service issues and 15% boost in employee satisfaction.
- Analyzed training effectiveness, leading to a 20% rise in customer satisfaction scores.
- Implemented stock and resource optimization strategies, reducing excess inventory by 20% and cutting operational costs by 12%.
- Led promotional campaigns based on customer behavior insights, increasing revenue by 25% and foot traffic by 20%.
- Streamlined workflows to remove bottlenecks, improving efficiency by 15%.
- Maintained consistent 95%+ quality adherence across audits and customer reviews.

Technical Skills

Programming Languages

Assembly, C, C++, Java, Python, R, SQL

Markup & Web Languages

CSS, HTML5

Software & Tools

- Google Workspace
- Microsoft Office (Excel, Sheets, Docs)
- MySQL, Oracle APEX
- Linux Command Line
- SAS (Studio, Viya)
- Code Block, GitHub, NetBeans
- POS Systems: X-Diner, Zeoniq, Yhofoodie

Data & Analytics Skills

- Data Cleaning & Preparation
- Exploratory Data Analysis (EDA)
- Data Mining Techniques
- Predictive Modelling
- Probability & Statistical Modelling
- Basic Machine Learning Concepts
- Requirements Analysis (SDLC, Waterfall)

Certifications

Red Hat System Administration

Soft Skills

Teamwork

Process Optimization

Quality Control

Problem Solving

Time Management

Completed Academic Projects

Python – Classroom Management System

- Built a basic Python system for attendance tracking and schedule management. Applied file handling, lists, and modular programming concepts.

Java – APU Medical Centre System (OODJ)

- Developed an OOP-based system with patient records, appointments, and billing using classes, inheritance, and exception handling.

C – Bus Reservation System

- Created a bus booking program supporting seat reservation, cancellation, and report generation using arrays, pointers, and file I/O.

Assembly – Shape Generation System

- Implemented geometric shape rendering using registers, loops, and low-level memory operations.

Systems Analysis & Design – Green Haven Resorts (GHR)

- Designed an information system using the SDLC (Waterfall) approach. Produced use-case diagrams, process diagrams, and system requirements.

System Development Method – APU TalentLink (Agile)

- Designed and prototyped an internship/job matching system using Agile sprints, user stories, and UI/UX mockups.

Data Management – Education Domain (SAS Studio)

- Performed basic data exploration and data cleaning on education datasets using SAS Studio. Applied simple statistical analysis and modelling techniques.

PERSONAL STATEMENT

Computer Science undergraduate with an interest in Data Analytics. Learned basic data concepts through coursework and academic projects. Familiar with programming languages such as Python, Java, C++, and SQL, and basic data analysis concepts.

Completed modules in statistical modelling, data mining, and database systems. Has basic exposure to data cleaning, exploratory data analysis, and simple predictive modelling through academic work.

Previous experience in operations and customer service helped develop problem-solving, communication, teamwork, and attention to detail. Currently seeking an entry-level or internship role to gain hands-on experience and improve technical and analytical skills.
